

Glitter Grit Sizing

The grain size of our glitters are measured in Grit Size.
This handy chart displays all the grit sizes we carry!

The Finest German Glass Glitter

Available in one ounce jars, & bulk packages from ¼ pound to hundreds of pounds!

100

100 Grit - Very Fine

Best for papercrafts, scrapbooking, fine craft and artwork. Provides the best coverage.

A favorite among artists and crafters due to its outstanding brilliance, color and diamond-like sparkle, Meyer Imports Glass Glitter is unlike any other glitter.

90

90 Grit - Fine (Popular)

Our most popular grit size. Great for a wide range of holiday and general craft & art projects

Meyer Imports Glass Glitter is made from real silver coated ground glass so the color is always bright and luminous. This is the highest-quality glitter available, made in Germany in very small batches by a small family run company.

80

80 Grit - Medium

This heavier grain is great where sparkle is more important than coverage.

Sometimes referred to as Vintage Glass Glitter, our Glitter will season with age, giving your project that lustrous glimmer & patina that only the best glass glitter can provide.

70

70 Grit - Course

This grain is chunky and really picks up and reflects light for the best sparkle!

Available in over 200 brilliant rich colors and grain sizes from fine ground glass to very course grits.

40

40 Grit - Super Shards

These small shards are the most unique glitters available! Known for maximum sparkle and shine!

From powder sugar super fine glitter to Super Shards of diamond like sparkles, we have what you need for your next project!

Providing the highest quality products from small independent European manufacturers to professional artists, designers and retailers around the world for over 20 years.
